DETAILED ACTION

Allowable Subject Matter

Claims 1-15 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: With respect to claim 1, the prior art failed to teach or render obvious the claimed integration period shorter than one period of a specific frequency, the detection period corresponding to one or more period of the specific frequency, the detection period included different detection periods, and calculating the distance value for each image element using a specific detection period which is one of one or more detection periods during which the light detection element does not reach saturation, and being one detection period during which a value related to the quantity of light received from the object space becomes maximum of that of the one or more detection periods. The prior art teaches range image sensor including multiple photosensitive units controlling light exposure to avoid sensor saturation. However, none of the prior art either singularly or in combination teaches the claimed system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
